Bigstone Creek Restoration Project

WILLOW CUTTING WORKSHOP

Are you a landowner who wants to have more forest cover around your stream, wetland, or lake? Or just interested in riparian areas?

Come learn how to harvest and plant stem cuttings that can provide this cover! We will spend the morning working outside on all the steps of willow staking, from sourcing cuttings, to proper preparation, to planting, all while restoring a local waterway!

Dress for the weather and bring **rubber boots** and **pruners/loppers** if you have them! We also ask that you bring your **own food** for a social distance picnic after!

Free workshop, but space is limited!

Register by contacting kbarkwell@county10.ca or calling 780-387-6182

Precautionary measures regarding COVID-19 will be followed.
