

Zoom webinar Aug 24, 26, 27 3-6PM
Field Day Sept 12 9AM – 4PM

Coen Farm
Ferintosh, AB

EARTHWORKS FOR COLD CLIMATE WATER RESILIENCY

Drought and flood are two sides of the same coin: A broken water cycle is the root cause of both. Join Takota Coen from Coen Farm and Rob Avis from Verge Permaculture for an online workshop and field day to follow at the Coen Farm. Learn how to design and implement low-tech, low-cost, nature-based earthworks that can build more effective and efficient water cycles on your land. Practice revegetation techniques and learn traditional uses of native plants.

The zoom webinar series will cover earthworks and construction topics. Coen Farm field day will include a farm tour, willow harvesting and staking, and a ceremony by a Maskwacis Elder.

Dress for the farm and the weather on Sept 12! Steel toed boots are recommended.

Please bring your own food and drink, food will not be provided due to CoVID-19.

\$30/person for the webinar, \$40/person for webinar and field day. Participants must attend webinar to attend the field day.

Students & Maskwacis community members please contact AWES for reduced rates.

Register on [Eventbrite](#) by Aug 22.
